Renewed by Lexus JC

★★★☆ 31 PAGES ЛИСТОВ | LENGTH ДЛИНА 41 CM | SCALE МАСШТАБ 1:96

FROM AUTHOR

If you have the opportunity to use the original, always do so! By purchasing the original edition, you support the author and make it possible for new models to be created. But, unfortunately, even original editions have certain issues that remain unaddressed for years.

This project was created to solve the following problems inherent in the original and scanned versions that you can freely download on the internet:
* Many of the magazines are no longer being published
* It has low print quality
* It doesn't satisfy those who want the model to look like it's made of wood, as the original lacks wood texture
* The appearance of decorative elements is unsatisfactory
* There are no supplements in the form of laser-cut and 3D-printed elements
* It's sometimes difficult to find the required element in the instructions

What distinguishes this magazine from other versions:
* 600 dpi resolution providing maximum print quality without artifacts
* All magazines are formatted so that the sheets are A4 size, while maintaining the model's scale. This advantageously distinguishes this edition from the original, where most models are presented on A3 sheets, and makes home printing accessible
* Sheets with parts have centimeter rulers horizontally and vertically, which makes it possible to fully maintain geometry when printing
* Wooden parts have appropriate texture, unlike the original, which gives the model the quality of a wooden kit
* This edition has interactive navigation and a table of contents. In any diagram or on any parts sheet, you can click on a number and go to the interactive table of contents, which has 3 columns: 1 - part number; 2 - all links on diagrams; 3- all links on parts sheets. Moreover, each link has two numbers in parentheses that correspond to X and Y coordinates in centimeters, counted from the upper left corner. This allows you to quickly find parts even by simply printing the interactive table of contents
* Contains links to Thingiverse where you can freely download files for laser cutting of the ship's hull and decks, as well as 3D models of decorative elements, artillery, and rigging elements

ОТ АВТОРА

Если у вас есть возможность использовать оригинал, делайте это всегда! Покупая оригинальное издание, вы поддерживаете автора и делаете возможным появление новых моделей. Но, к сожалению, даже в оригинальных изданиях есть некоторые проблемы, которые не исправляются годами.

Этот проект появился для того, чтобы решить следующие проблемы, присущие оригиналу и сканированным версиям, которые вы можете свободно скачать в интернете:
* Многие из журналов уже не издаются
* Имеют низкое качество печати
* Не подходят тем, кто хочет, чтобы модель выглядела как сделанная из дерева, так как у оригинала отсутствует текстура дерева
* Не устраивает вид декоративных элементов
* Отсутствуют дополнения в виде лазерной резки и 3D-печатных элементов
Иногда сложно найти в инструкции нужный элемент

Что отличает этот журнал от остальных версий:
* Разрешение 600 dpi, обеспечивающее максимально качественную печать без артефактов
* Все журналы свёрстаны таким образом, что листы представляют собой формат А4, при этом масштаб модели сохранён. Это выгодно отличает данное издание от оригинала, где большинство моделей представлены на листах формата А3, и делает доступной домашнюю печать
* Листы с деталями имеют сантиметровую линейку по горизонтали и вертикали, что даёт возможность полностью соблюсти геометрию при печати
* Деревянные детали имеют соответствующую текстуру, в отличие от оригинала, что придаёт модели качество wooden kit
* Данное издание имеет интерактивную навигацию и оглавление. В любой схеме или на любом листе с деталями можно кликнуть по номеру и перейти к интерактивному оглавлению, где имеются 3 колонки: 1 - номер детали; 2 - все ссылки на схемах; 3 - все ссылки на листах с деталями. Причём каждая ссылка имеет в скобках две цифры, которые соответствуют координатам X и Y в сантиметрах, считая от верхнего левого угла. Это позволяет быстро отыскивать детали, даже просто распечатав интерактивное оглавление
* Содержит ссылки на Thingiverse, где вы можете бесплатно скачать файлы для изготовления лазерной резки каркаса корабля и палуб, а также 3D-модели декоративных элементов, артиллерии и элементов такелажа

SCHWARZER RABE (1627)

Fluyt is a type of sailing ship, created in the Netherlands at the end of the sixteenth century. These types of ships, also built in shipyards in Germany and around the Baltic Sea, have common features distinguishing them from other types of sailing ships. This includes a characteristic round stern, and the construction and proportions of the hull. A curious fact is that the Dutch fluyts, whose purpose was to travel to Baltic ports, had such hull proportions so as to incur the smallest duty from the Danish customs. By contrast, fluyts that sailed to the West, for example to Spain or Africa, were strongly armed because of the great presence of privateers from Dunkirk.
The seaworthiness, suitability for armament, and sufficient loading capacity, made these, perhaps the most interesting ships from this period, multipurpose vessels. The fluyts were used for, amongst others, research and discovery expeditions, and attacks on privateers, trading cruises and as a whale catchers.
The pristine reconstruction of Abel Tasman's fluyt Zeehaen, from his expedition of discovery to Australia, was undertaken by the curator of the historical models collection at the Amsterdam Rijksmuseum, Mr Ab Hoving. Reconstruction drawings and historical information was published in his book, "The Ships of Abel Tasman".
The Schwarzer Rabe was one of six fluyts detained by Polish vessels for the carriage of contraband to Sweden. In the victorious battle of Oliwa (28 XI 1627) for the Polish royal fleet, she was part of the first squadron, which also consisted of the galleons Święty Jerzy (St George) and Rączy Jeleń (Flying Deer), and the pinnaces Panna Wodna (Sea Virgo) and ŻÃ³łty Lew (Yellow Lion).

Dimensions - Schwarzer Rabe:
length - approximately 106 feet
breadth - approximately 6,9 m
tonnage (capacity) - 130 lasts
Dimensions of model - Schwarzer Rabe:
length: 40,5 cm
breadth: 16,8 cm
height: 34,5 cm
Armament:
8 bronze cannons
2 iron cannons
On board the vessel were 35 sailors and 80 soldiers.

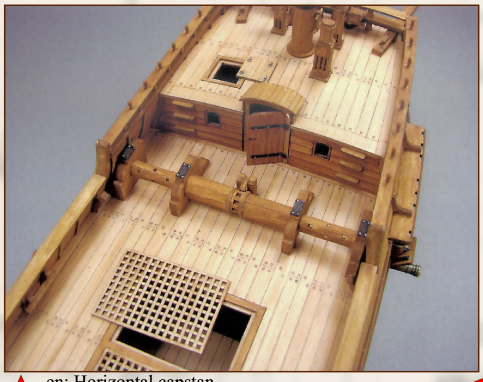

Флют это тип парусного судна, созданный в Нидерландах в конце шестнадцатого века. Эти типы судов, также строившиеся на верфях Германии и вокруг Балтийского моря, имеют общие черты, отличающие их от других типов парусных судов. Сюда относятся характерная круглая корма, а также конструкция и пропорции корпуса. Любопытным фактом является то, что голландские флюты, предназначавшиеся для плавания в балтийские порты, имели такие пропорции корпуса, чтобы нести наименьшую пошлину от датской таможни. Напротив, флюты, которые плавали на Запад, например, в Испанию или Африку, были сильно вооружены из-за большого присутствия каперов из Дюнкерка.
Мореходность, пригодность для вооружения и достаточная грузоподъемность сделали эти, пожалуй, самые интересные суда этого периода, многоцелевыми судами. Флюты использовались, среди прочего, для исследовательских и поисковых экспедиций, атак на каперов, торговых рейсов и в качестве китобойных судов.
Безупречная реконструкция флюта Абеля Тасмана Зеехан из его экспедиции по открытию Австралии была предпринята куратором коллекции исторических моделей Амстердамского Рейксмузеума г-ном Абом Ховингом. Чертежи реконструкции и историческая информация были опубликованы в его книге "Корабли Абеля Тасмана".
Шварцер Рабе был одним из шести флютов, задержанных польскими судами за перевозку контрабанды в Швецию. В победоносной битве при Оливе (28 ноября 1627 года) за польский королевский флот он входил в состав первой эскадры, которая также состояла из галеонов Свенты Ежи (Святой Георгий) и Рончы Елень (Летящий Олень), а также пинасов Панна Водна (Морская Дева) и Жулты Лев (Желтый Лев).

Размеры - Шварцер Рабе:
длина - приблизительно 106 футов
ширина - приблизительно 6,9 м
тоннаж (вместимость) - 130 ластов
Размеры модели - Шварцер Рабе:
длина: 40,5 см
ширина: 16,8 см
высота: 34,5 см
Вооружение:
8 бронзовых пушек
2 железные пушки
На борту судна находились 35 матросов и 80 солдат.

ru: Руль, хорошо видны украшения вокруг дверцы и окон.

en: Galleon carving.
ru: Галеонная резьба.

en: Stern companionway.
ru: Кормовая сходня.

BUILDING INSTRUCTIONS

The model has been developed in a 1:96 scale based on all available historical sources, plans and shipyard drawings from the era. The following guidelines will help you in the proper construction of the model, and also improve the standard of workmanship.

* Assembly of the ship is based on photos and diagrams contained in this issue, in the order in which parts are numbered.
* For any part that requires thickening by gluing onto cardboard, the thickness of the cardboard that should be used is clearly indicated (on the photos and diagrams), to ensure that parts fit together.
* When gluing together the skeleton, close attention should be paid to the perpendicular or parallel positioning of elements relative to each other to prevent warping of the hull.
* After gluing on the longitudinal hull planking, the hull below the waterline can be puttied (eg. with putty PUFAS). Before puttying however, the plank edges should be soaked (sealed) with cyanoacrylate glue (eg. SuperGlue) or clear oil varnish.
* For parts with printed boards/planks on them, score along the printed join lines with a razor blade (to imitate gaps between the boards), and then paint with acrylic paints to imitate wood.
* For all openings (hatches, gunports and other), as well as other parts difficult to cut with scissors, it is best to cut with chisels of different widths.
* Fittings and metal elements (rings, hooks) can be made of copper wire (or iron) and sized according to the supplied templates, then painted to imitate iron.
* For thread and cord, remove unsightly hairs by soaking in varnish.
* For the rigging start with the standing rigging - the lower shrouds, upper shrouds and stays. The next step is to hang the sails on the stays. Then hang the yards and sails with their running rigging.
* Weather the canvas for the sails by dying it in tea essence.
* Sculptures made of polymer clay will be much more authentic.
* The choice is left to the modeller as to the kind of glue to be used (a good glue is a rubber adhesive), as well as the simple tools (scissors, knives, etc. ..)

Roll the element a tight rooll

Roll the element up

Stick up ti required thickness (the number signifies element thickness in millimiters)

ИНСТРУКЦИЯ ПО СБОРКЕ

Модель разработана в масштабе 1:96 на основе всех доступных исторических источников, чертежей и судостроительных рисунков той эпохи. Следующие рекомендации помогут вам правильно собрать модель, а также повысить качество исполнения.

* Сборка корабля производится по фотографиям и схемам, содержащимся в данном выпуске, в порядке нумерации деталей.
* Для любой детали, требующей утолщения путём наклеивания на картон, толщина используемого картона чётко указана (на фотографиях и схемах) для обеспечения правильной подгонки деталей.
* При склеивании набора корпуса следует уделять особое внимание перпендикулярному или параллельному позиционированию элементов относительно друг друга для предотвращения коробления корпуса.
* После приклеивания продольной обшивки корпуса, часть корпуса ниже ватерлинии может быть зашпатлёвана (например, шпатлёвкой PUFAS). Перед шпатлеванием края досок следует пропитать (загерметизировать) цианоакрилатным клеем (например, SuperGlue) или прозрачным масляным лаком.
* Для деталей с напечатанными досками/планками сделайте надрезы по напечатанным линиям стыков лезвием бритвы (для имитации зазоров между досками), а затем покрасьте акриловыми красками для имитации дерева.
* Для всех отверстий (люков, орудийных портов и других), а также других деталей, которые трудно вырезать ножницами, лучше всего использовать стамески разной ширины.
* Фурнитура и металлические элементы (кольца, крюки) могут быть изготовлены из медной проволоки (или железной) и подогнаны по размеру согласно прилагаемым шаблонам, затем покрашены для имитации железа.
* Для нитей и шнуров удалите некрасивые ворсинки, замочив их в лаке.
* Для такелажа начните с бегучего такелажа - нижние и верхние ванты, штаги. Следующий шаг - подвеска парусов на штагах. Затем подвесьте реи и паруса с их бегучим такелажем.
* Состарьте парусину для парусов, окрасив её в чайном растворе.
* Скульптуры из полимерной глины будут выглядеть гораздо более аутентично.
* Выбор типа клея остаётся за моделистом (хороший клей - резиновый клей), а также простых инструментов (ножницы, ножи и т.д.).

Деталь сделать плотной скруткой

Деталь скрутить

Подклеить деталь на бумагу до получения указанной толщины в мм

Attention!
Numbers in triangles give thickness of ropes in mm (scale 1:96).

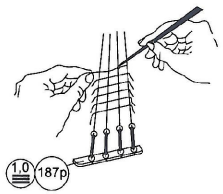

Внимание!
Числа в треугольниках указывают толщину тросов в мм (масштаб 1:96).

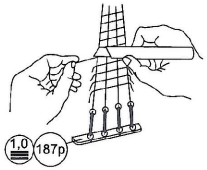

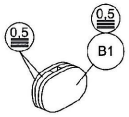

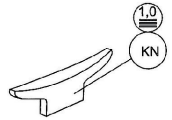

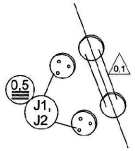

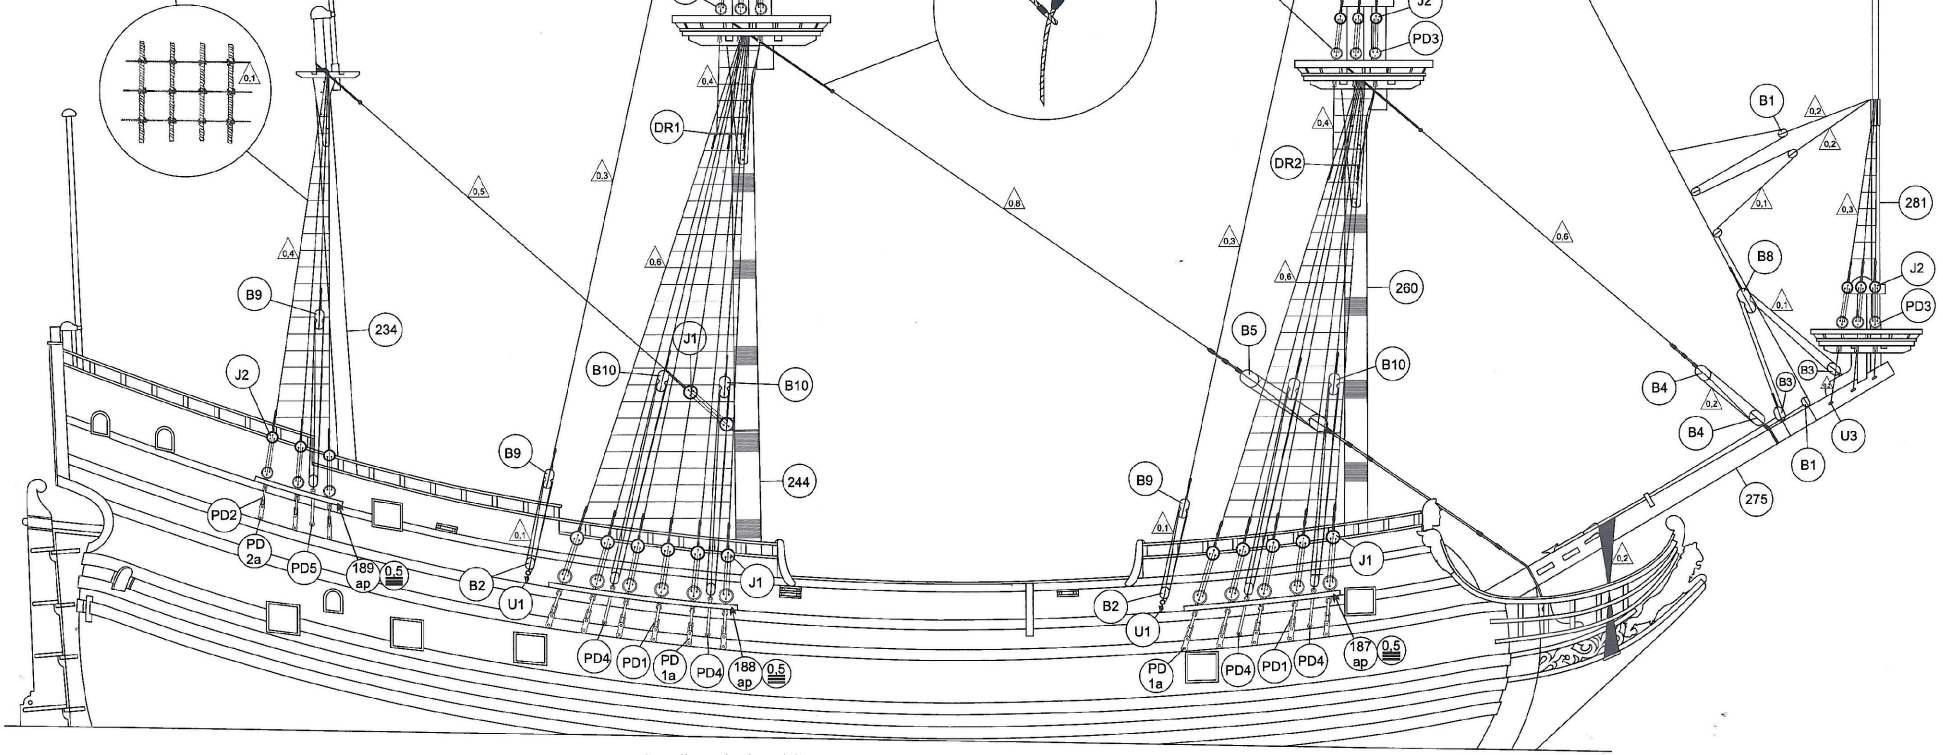

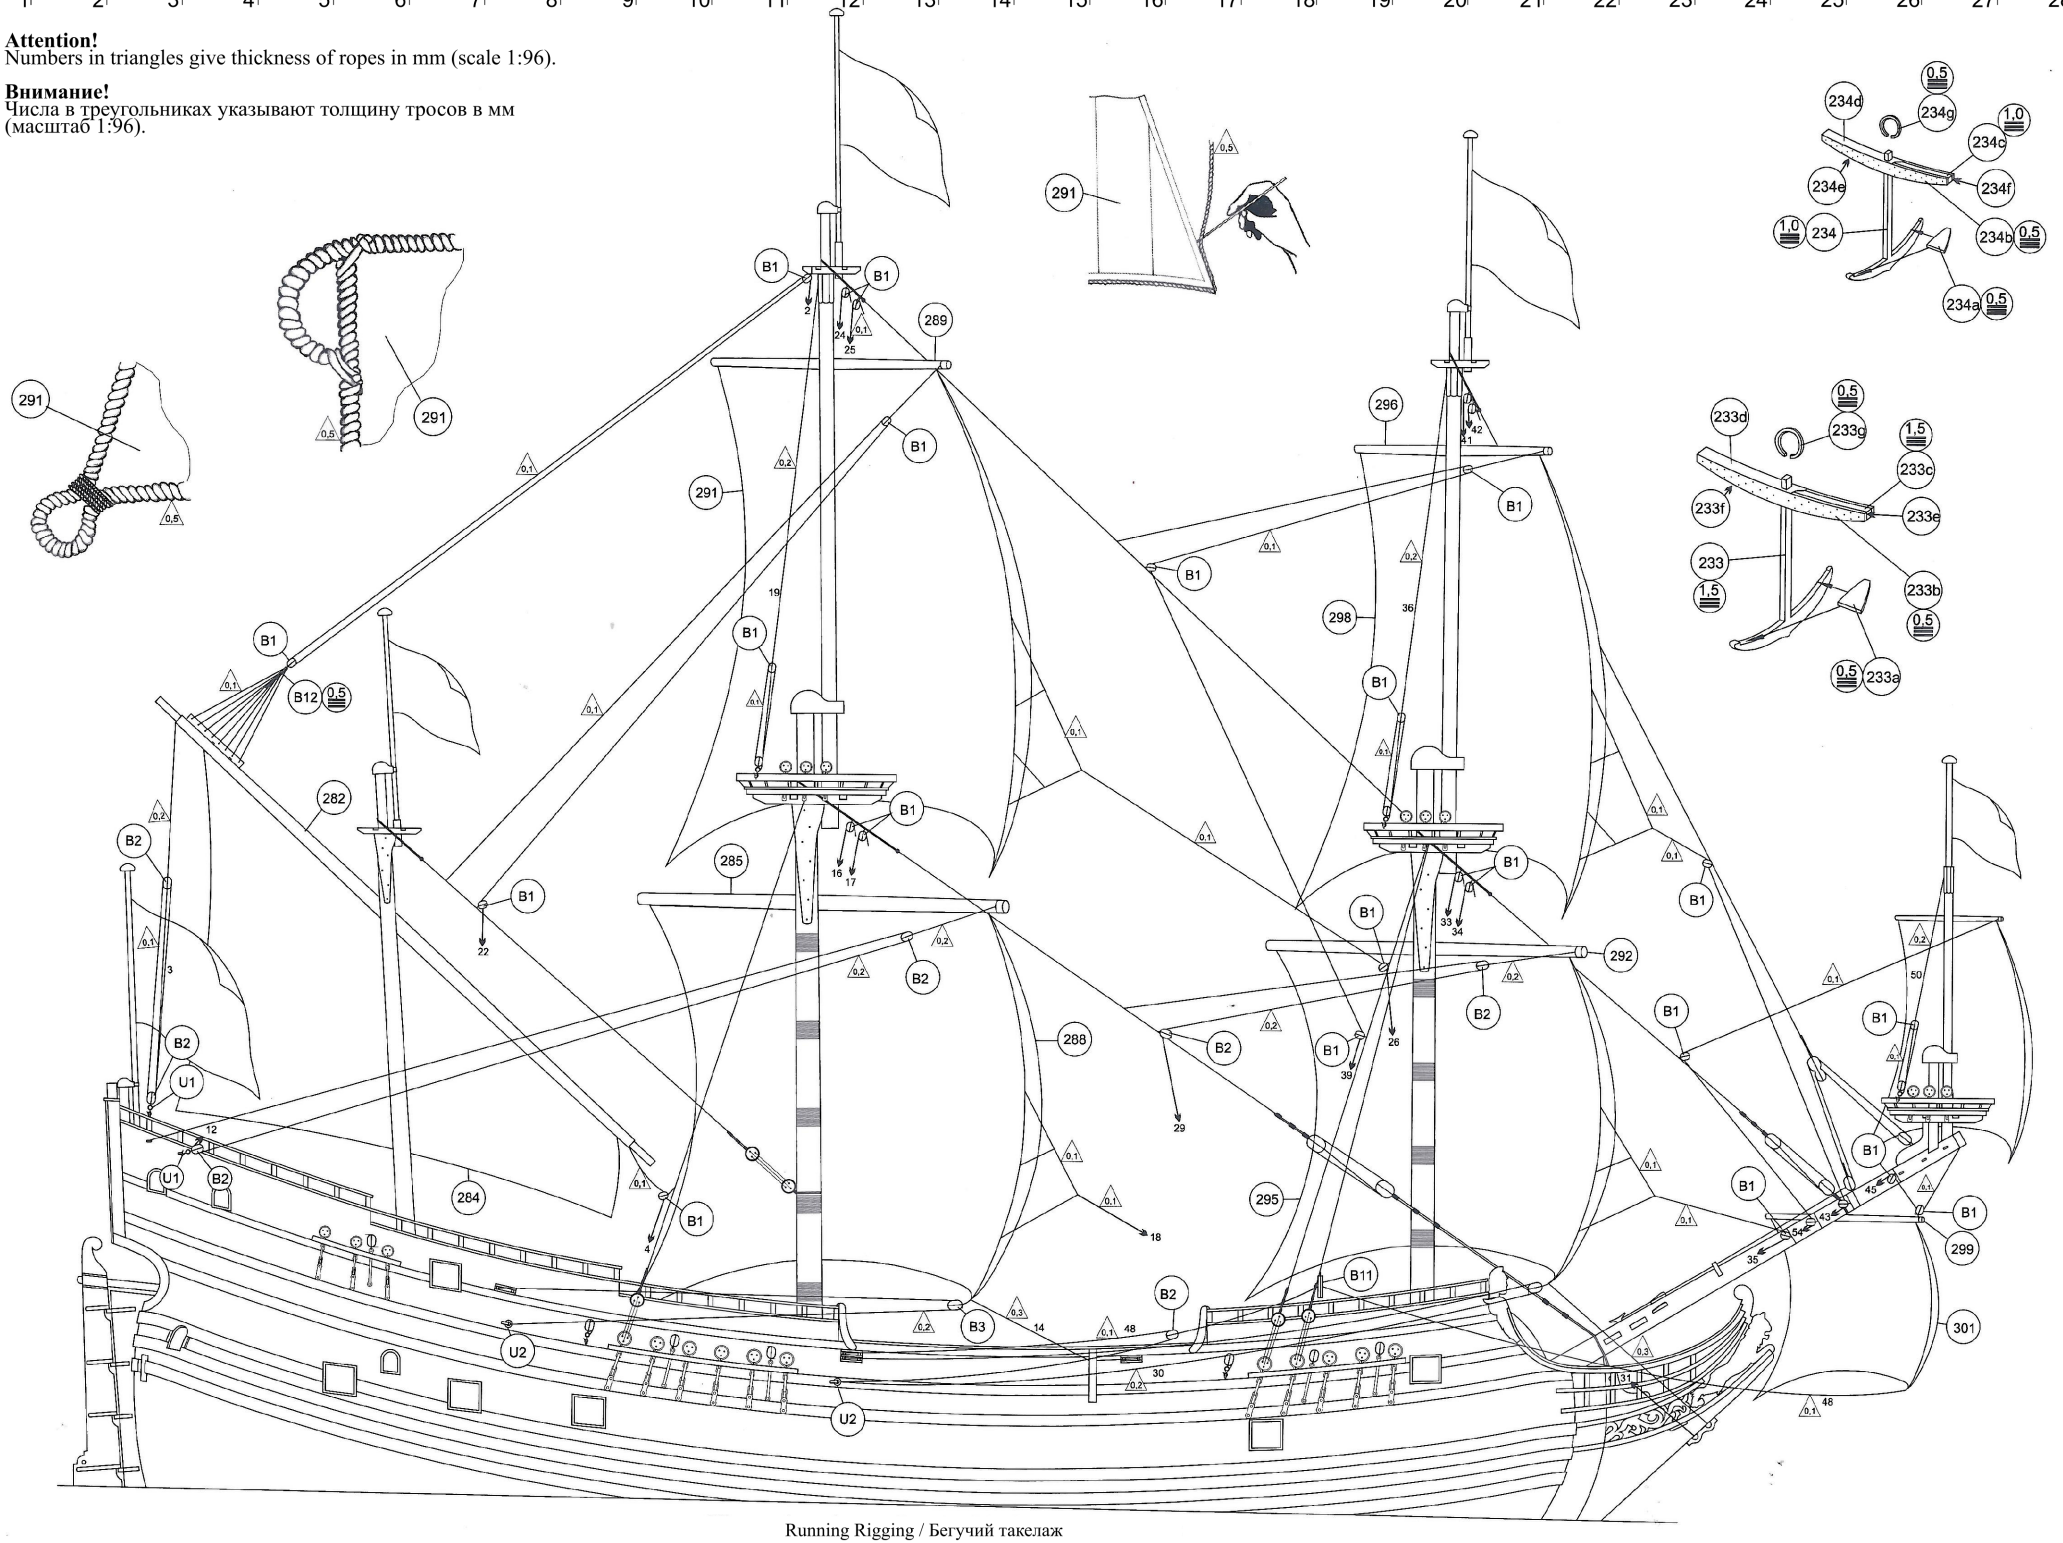

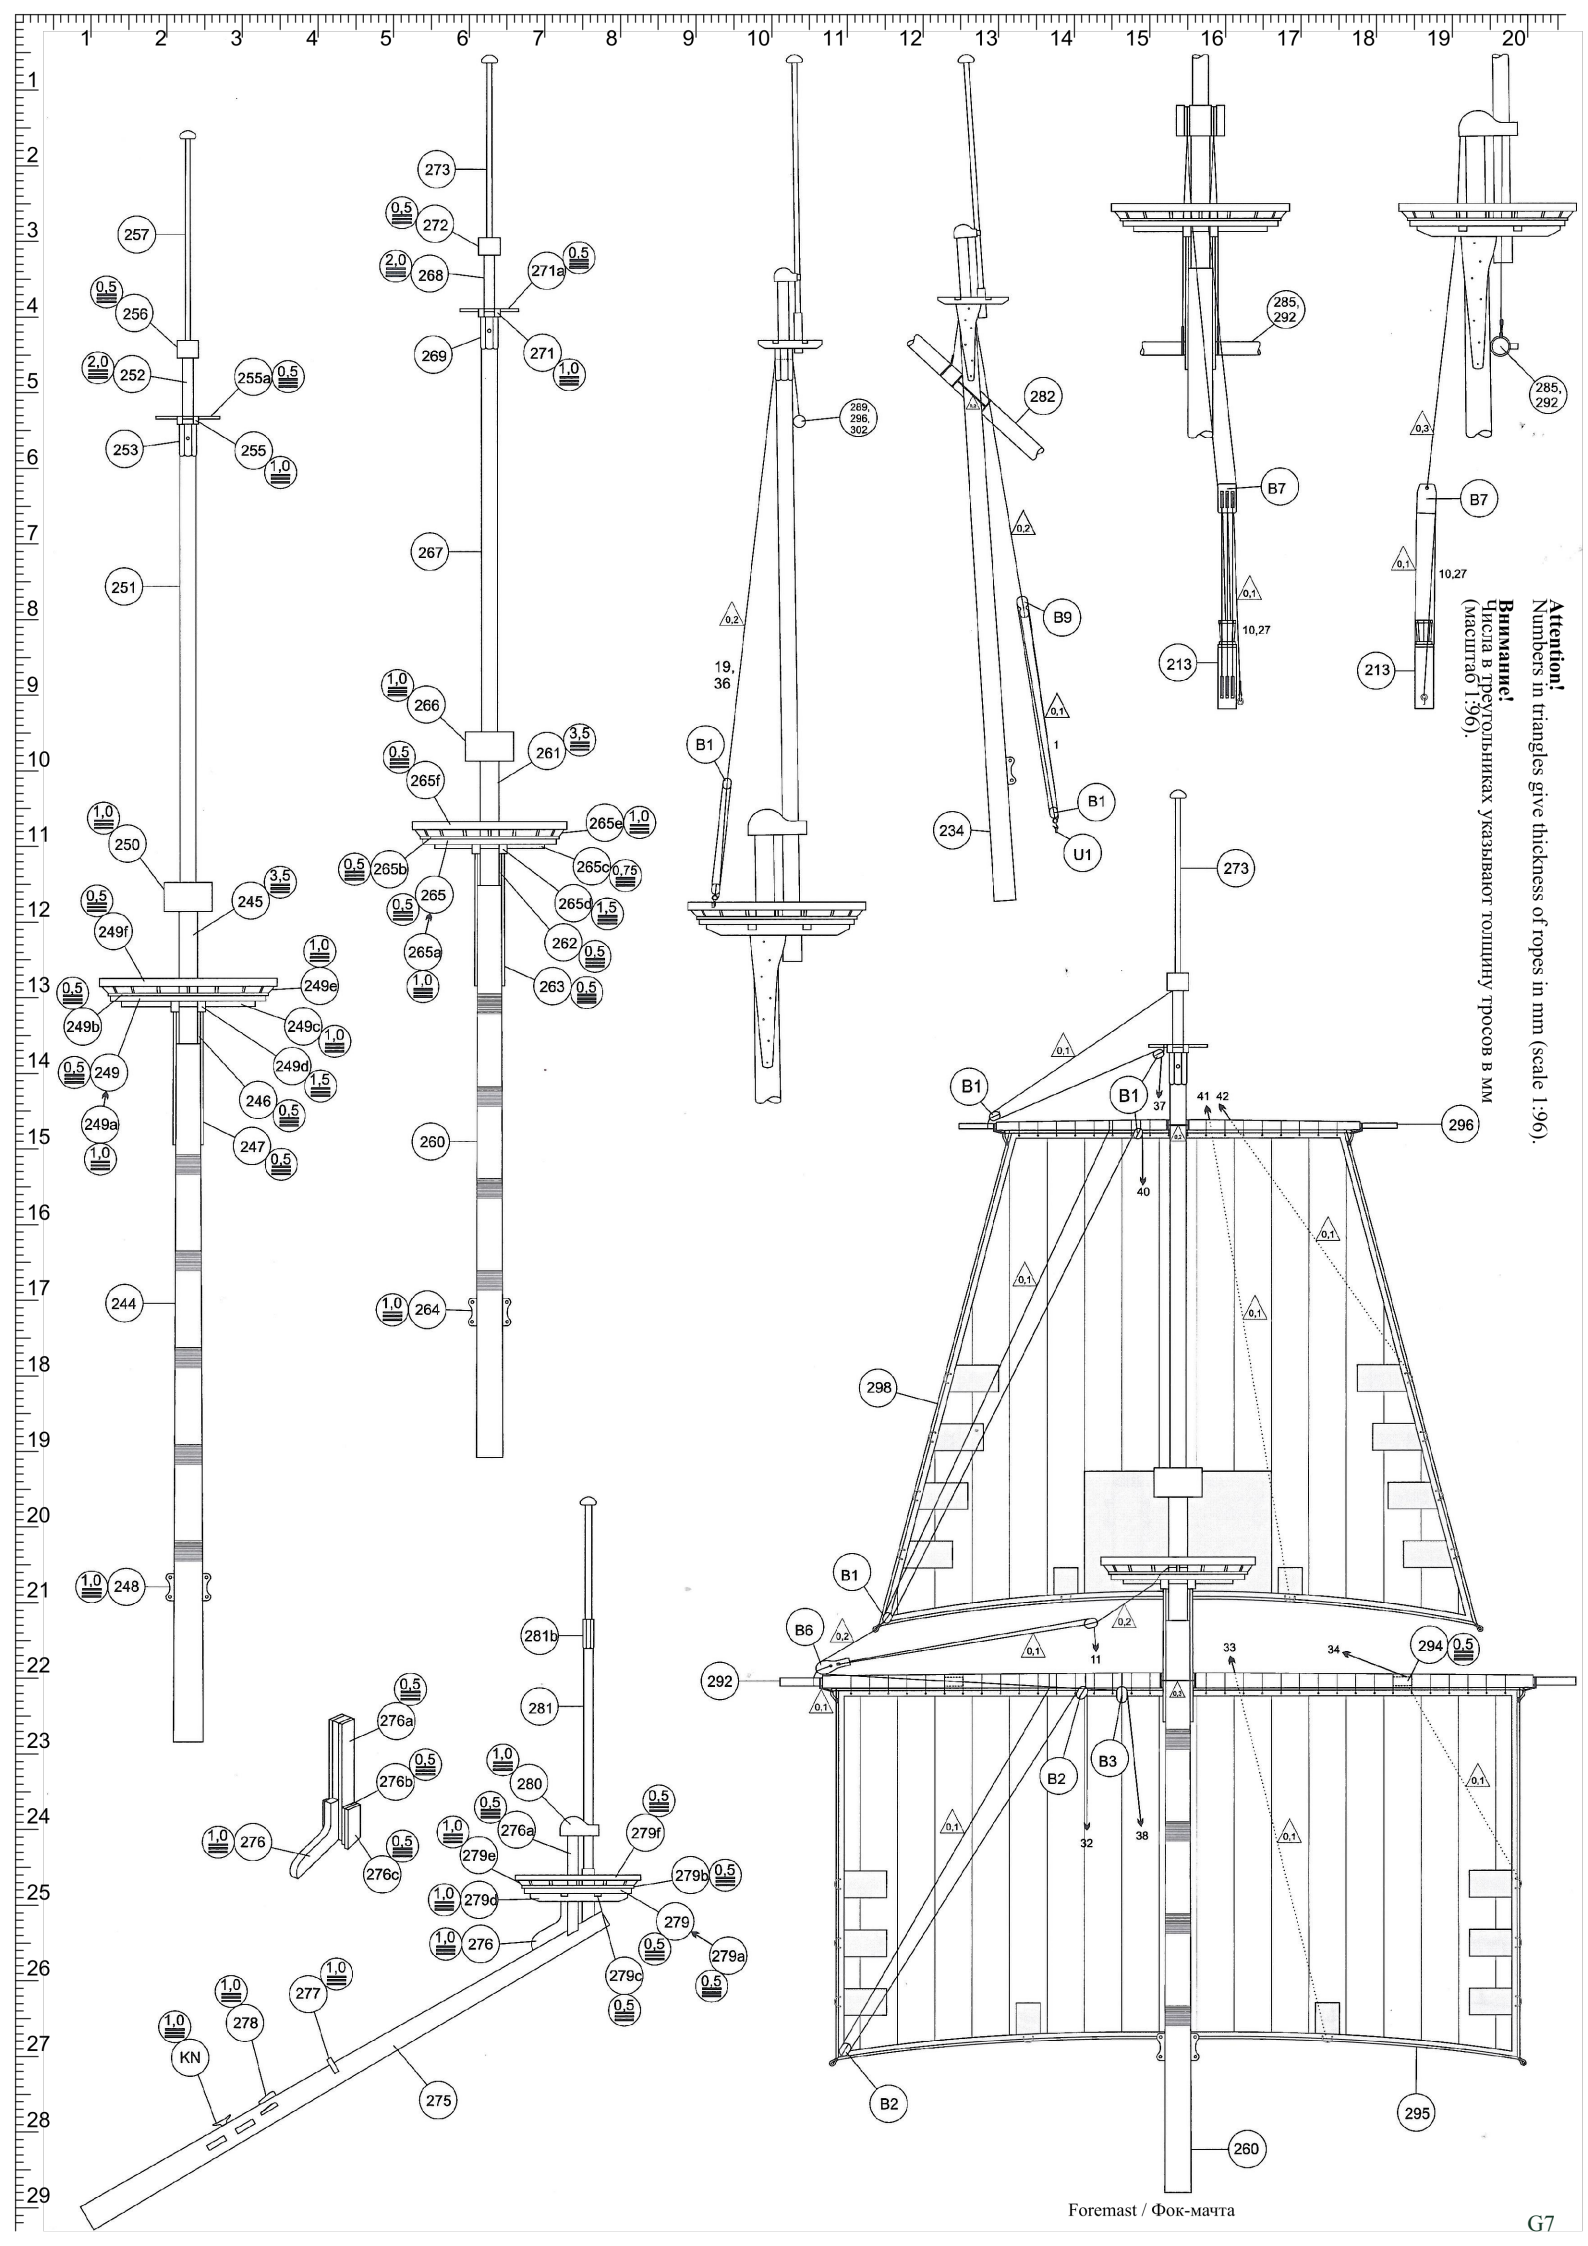

Standing Rigging / Стоячий такелаж

Attention!
Numbers in triangles give thickness of ropes in mm (scale 1:96).

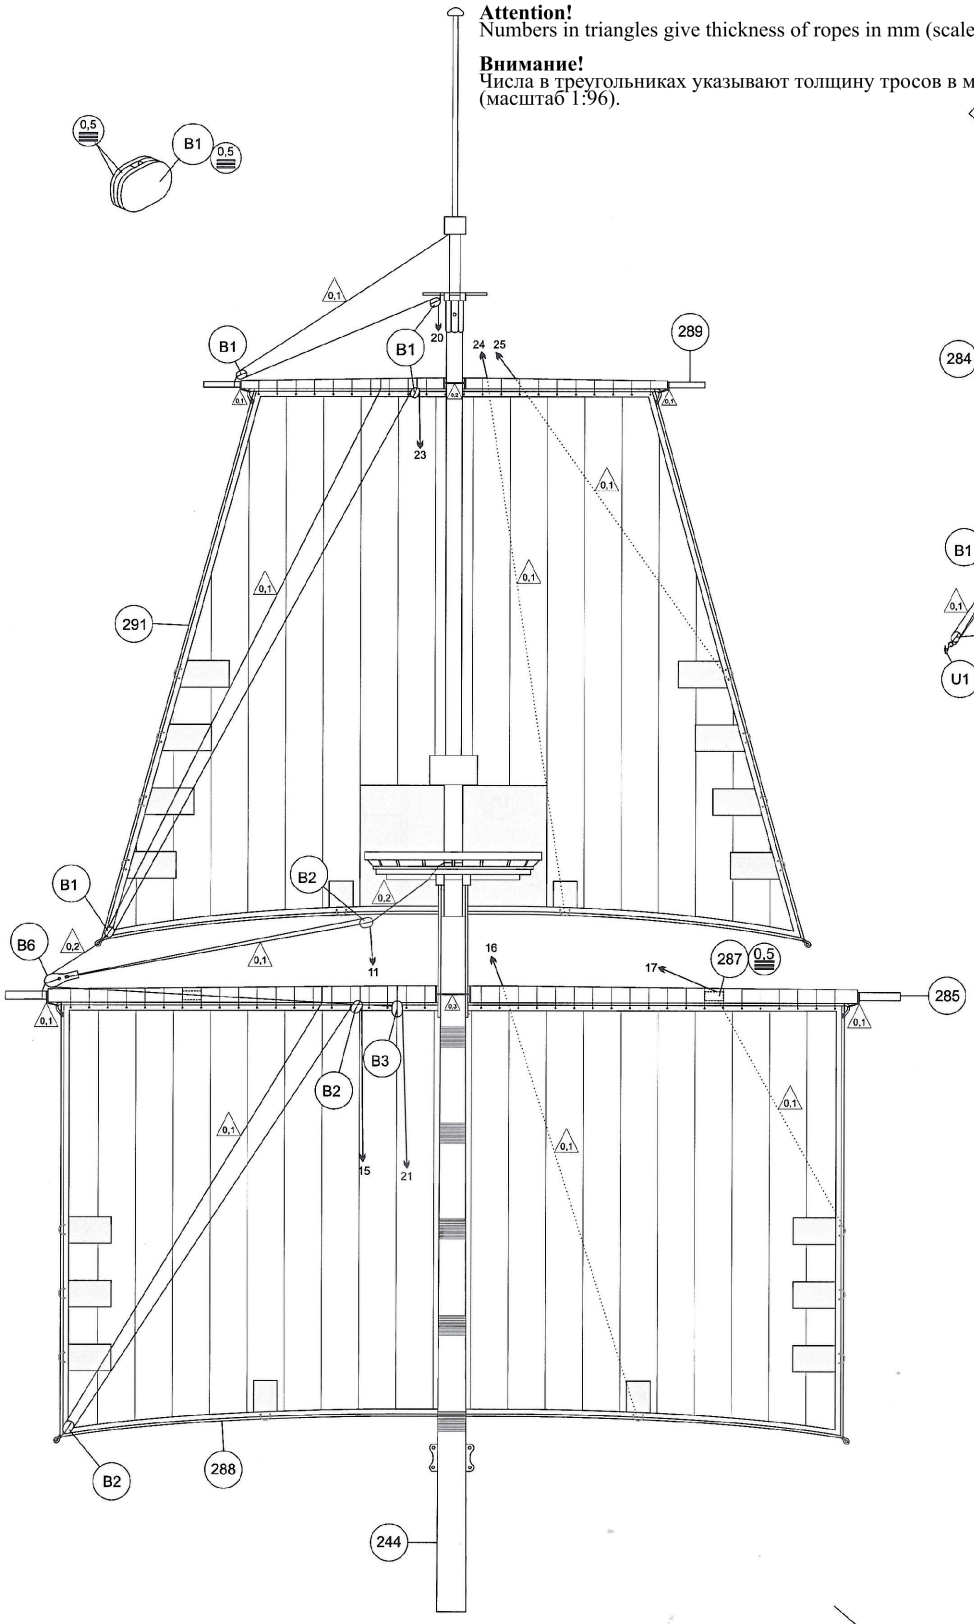

Внимание!
Числа в треугольниках указывают толщину тросов в мм (масштаб 1:96).

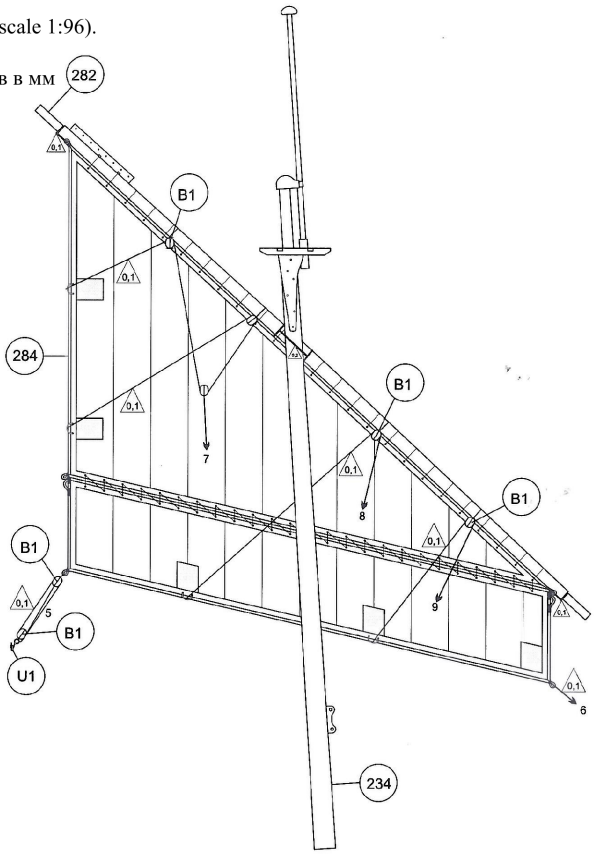

Attention!
Numbers in triangles give thickness of ropes in mm (scale 1:96).
Внимание!
Числа в треугольниках указывают толщину тросов в мм (масштаб 1:96).
Foremast / Фок-мачта

Attention!
Numbers in triangles give thickness of ropes in mm (scale 1:96).

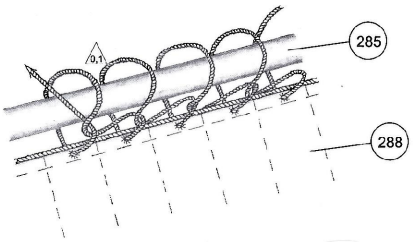

Внимание!
Числа в треугольниках указывают толщину тросов в мм (масштаб 1:96).

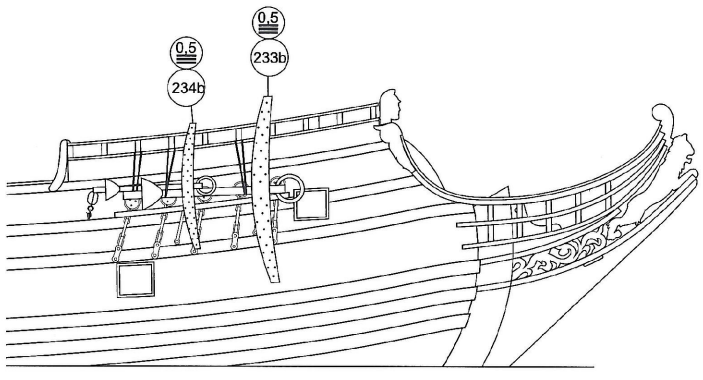

Main mast / Грот-мачта

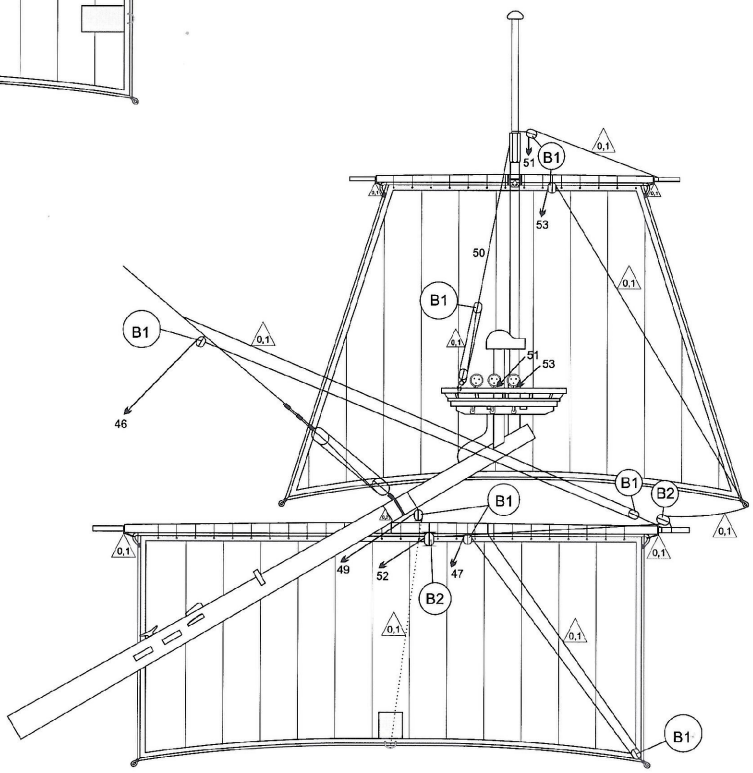

Mizzen mast / Бизань-мачта

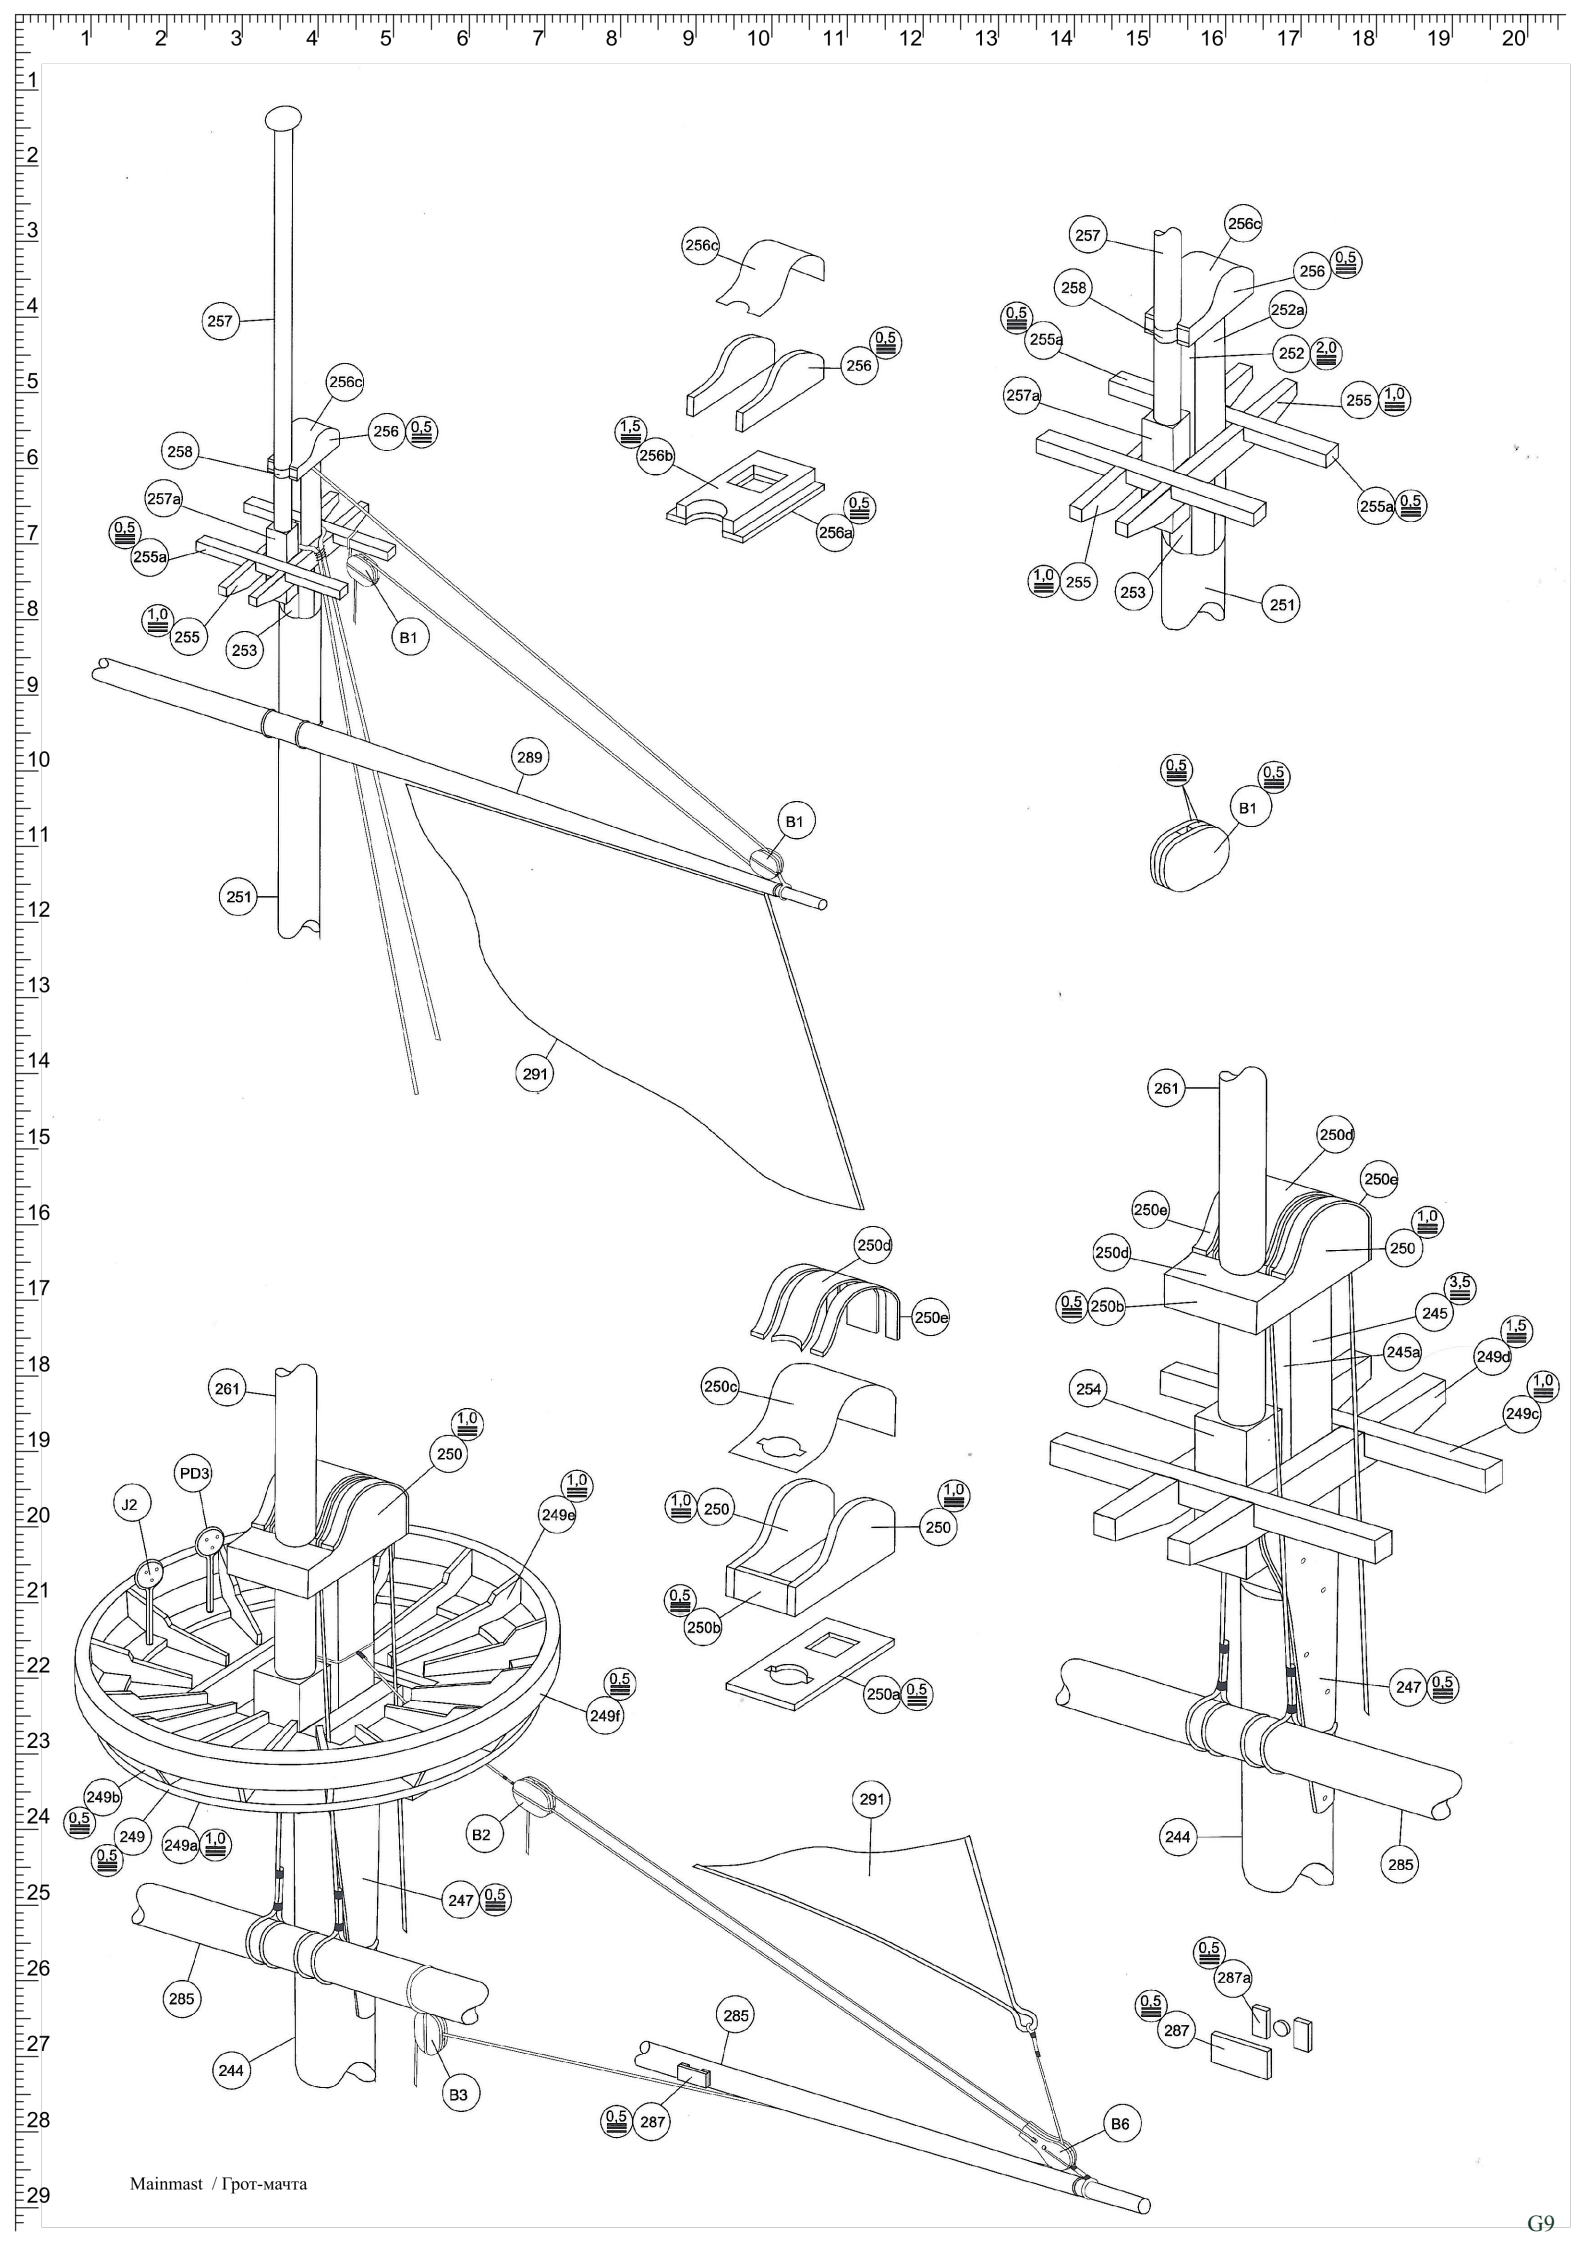

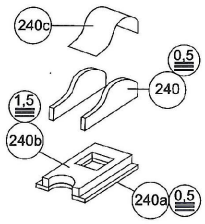

Anchors hanging / Обвязка якорей

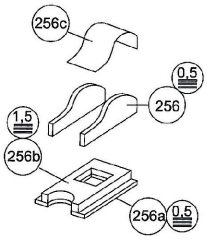

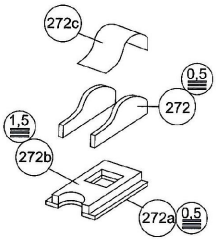

Bowsprit / Бушприт

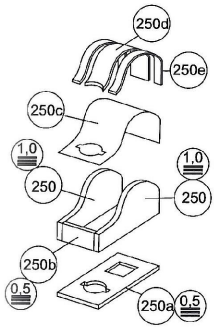

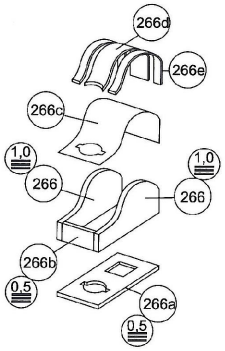

Mainmast / Грот-мачта
